

## Recursion Announces Webinar For Upcoming Clinical Data Readout on the TUPELO Phase 1b/2 Trial of REC-4881 in Familial Adenomatous Polyposis on December 8, 2025

December 1, 2025

Salt Lake City, Dec. 01, 2025 (GLOBE NEWSWIRE) -- Recursion (Nasdaq: RXRX) a leading clinical stage TechBio company decoding biology to radically improve lives, announced today that it will present a new clinical readout from the ongoing TUPELO Phase 1b/2 trial of REC-4881 in FAP at an upcoming company webinar. The webinar will be held on December 8, 2025 at 8:00 am ET / 6:00 am MT / 1:00 pm GMT, and will be streamed live on Recursion's [X](#), [LinkedIn](#), and [YouTube](#) accounts.

**Webinar title:** Ongoing Phase 1b/2 Trial of the Allosteric MEK1/2 Inhibitor REC-4881 as Monotherapy in Familial Adenomatous Polyposis (FAP): Updated Safety and Efficacy

### Presenters:

- **Najat Khan, Ph.D.**, Chief R&D and Chief Commercial Officer and incoming CEO and President, Recursion
- **David Mauro, M.D., Ph.D.**, Chief Medical Officer, Recursion
- **Beth Bruckheimer, Ph.D.**, Vice President of Clinical Development, Recursion
- **Jessica Stout, D.O.**, Assistant Clinical Professor, University of Utah School of Medicine
- **Alfred Cohen, M.D.**, Former CMO, Cancer Prevention Pharmaceuticals; Prior Chief, Colorectal Service, Memorial Sloan Kettering Cancer Center

### About Recursion

Recursion (NASDAQ: RXRX) is a clinical stage TechBio company leading the space by decoding biology to radically improve lives. Enabling its mission is the Recursion OS, a platform built across diverse technologies that continuously generate one of the world's largest proprietary biological and chemical datasets. Recursion leverages sophisticated machine-learning algorithms to distill from its dataset a collection of trillions of searchable relationships across biology and chemistry unconstrained by human bias. By commanding massive experimental scale — up to millions of wet lab experiments weekly — and massive computational scale — owning and operating one of the most powerful supercomputers in the world, Recursion is uniting technology, biology and chemistry to advance the future of medicine.

Recursion is headquartered in Salt Lake City, where it is a founding member of BioHive, the Utah life sciences industry collective. Recursion also has offices in Montréal, New York, London, and the Oxford area. Learn more at [www.recursion.com](#), or connect on [X](#) and [LinkedIn](#).

### Forward-Looking Statements

This document contains information that includes or is based upon "forward-looking statements" within the meaning of the Securities Litigation Reform Act of 1995, including, without limitation, those regarding the timing of the announcement of clinical trial data and associated webinar and scheduled presenters; early and late stage discovery, preclinical, and clinical programs; licenses and collaborations; prospective products and their potential future indications and market opportunities; Recursion OS and other technologies; business and financial plans and performance; and all other statements that are not historical facts. Forward-looking statements may or may not include identifying words such as "plan," "will," "expect,"

"anticipate," "intend," "believe," "potential," "continue," and similar terms. These statements are subject to known or unknown risks and uncertainties that could cause actual results to differ materially from those expressed or implied in such statements, including but not limited to: challenges inherent in pharmaceutical research and development, including the timing and results of preclinical and clinical programs, where the risk of failure is high and failure can occur at any stage prior to or after regulatory approval due to lack of sufficient efficacy, safety considerations, or other factors; our ability to leverage and enhance our drug discovery platform; our ability to obtain financing for development activities and other corporate purposes; the success of our collaboration activities; our ability to obtain regulatory approval of, and ultimately commercialize, drug candidates; our ability to obtain, maintain, and enforce intellectual property protections; cyberattacks or other disruptions to our technology systems; our ability to attract, motivate, and retain key employees and manage our growth; inflation and other macroeconomic issues; and other risks and uncertainties such as those described under the heading "Risk Factors" in our filings with the U.S. Securities and Exchange Commission, including our Annual Report on Form 10-K and Quarterly Reports on Form 10-Q. All forward-looking statements are based on management's current estimates, projections, and assumptions, and Recursion undertakes no obligation to correct or update any such statements, whether as a result of new information, future developments, or otherwise, except to the extent required by applicable law.
